Primary care physicians were trained in basic surgical care and then organized into an emergency surgical team. Emergency surgical services were developed in a free-standing rural surgical hospital to reduce the impact of a severe recession on rural health care. The rural medical community agreed to utilize these services and signed a "Memorandum of Understanding." The new service included six teams that responded to the services of a single, nearby Level I trauma center, one team to treat patients with malignant neoplasms, and three teams to provide general surgical care. Emergency surgery for malignant neoplasms was limited to one of the teams. Early experience was positive and 633 patients were treated with a mean time to definitive care of 2.2 hours (SD, 1.5). Most patients were treated within a 3-hour driving distance from the hospital. This model offers a viable solution to the problems of rural health care. Actions The Town of Murrieta is banning single-use Styrofoam. "Our community is trying to reduce waste and this is the simplest, most effective thing we could do to reduce waste and keep the community clean," said Town Council member Shelly Katz, who drafted the ban. Styrofoam packaging is a common example of a polymer that does not biodegrade and can lead to global warming. The ban goes into effect Tuesday, Aug. 20, and will be in effect for one year. Store owners in Murrieta will be required to use paper and/or biodegradable packing for their products, including bubble wraps and packing peanuts. "One of the things we did was we did a survey and we found that people here in Murrieta are really environmentally friendly people," Katz said. The next step is to educate people to reduce waste and single-use plastic. "When we go out
