Link: HOPE THIS HELP... AND IN GENERAL I WOULD LIKE IT TO BE PUBLISHED! In general, I study at the Faculty of Information Technology. We have several courses from the same lab. One of them is called: Project Management. I have a question: is there any tutorial for this program? not necessarily a project management book, but something to help you understand the core concepts so you can apply them to your work? Please let me know in general if this is helpful to you!
